

PENTAIR POOL BUILDER

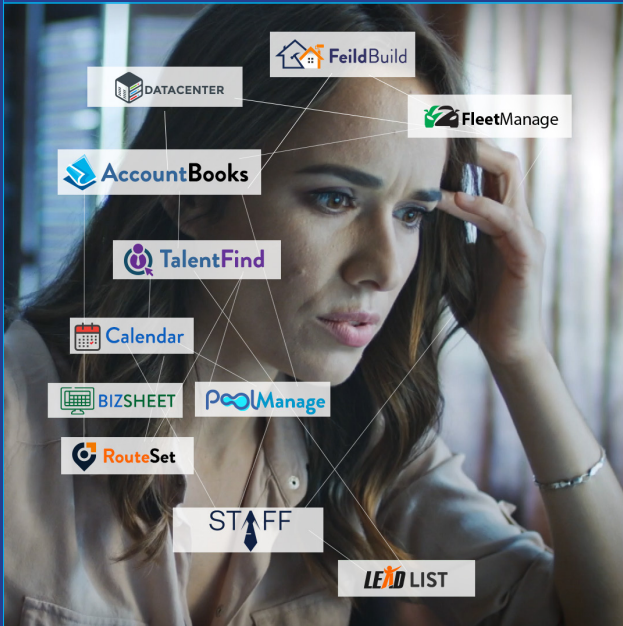

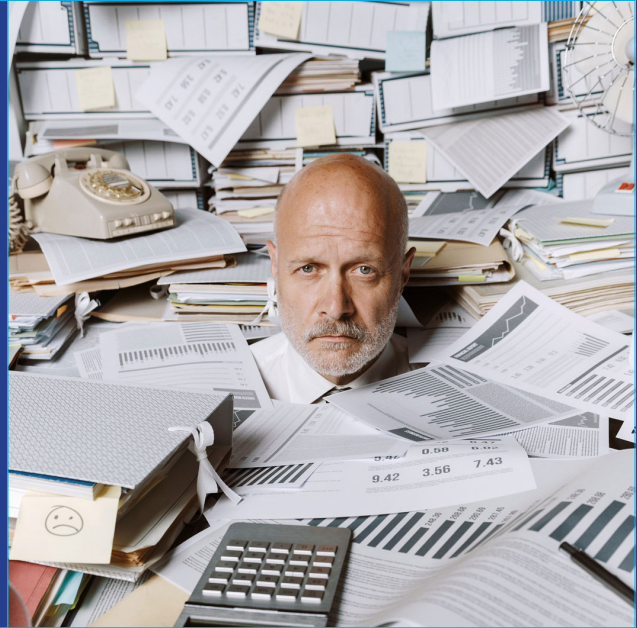

The ultimate end-to-end business software for professional Pool Builders

Optimize operations.
Improve efficiency.
Build your bottom line.

Wazzup?

- Stuck with old ways of managing your business?
- Great at building pools but need help when it comes to running your operation?
- Confused which technology you should adopt to run your business more efficiently?
- Not much luck piecing different software platforms together to build a system that works for you?

It's complicated.

- Moving to a new business platform can be costly, time consuming and confusing
- Patching together what you use now with new software can 'lock you in' and limit scaling your business
- A single solution backed by a reputable partner is paramount to ensure your business runs smoothly, safely and efficiently

Imagine.

- Cultivating leads into solid sales
- Easily creating accounts and jobs
- Managing all planning and scheduling
- Full 'on-site' job management from any mobile device
- Remote monitoring via video, saving you time, travel, and expense
- Making change orders, invoicing and receiving payments from in the field
- All customers in one master system

You've arrived!

PENTAIR POOL BUILDER

What they say

“It’s a very efficient software platform and app, and it has helped streamline the building process.”

Tom Fleeman,
Project Manager,
Backyard Oasis

“It gives our whole team the ability to see what’s going on in real time.”

Susan Rodríguez
Office Manager
Cypress Pools

- Invoicing for every draw

Here to Help

- Dedicated account manager
- Contact how you want to (Email, Phone)
- Professional Services (VIP treatment) we take care of the tough stuff
- Training anytime at no additional cost

The power of video

Improve communications with remote video monitoring. Making a judgement call sometime requires a site visit. NOT ANY MORE.

The remote job monitoring feature allows you to get better with scheduling and accountability. Is someone on the job site doing what they are supposed to be doing so the next thing can be scheduled.
